Headgear Strap Clips (4)	Polypropylene, Black

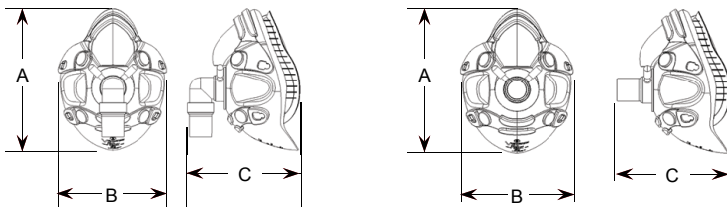

Oro-Nasal NIV V2 Mask™ with Headgear
Elbow and Straight Type Swivel Port Shown

GENERAL INFORMATION

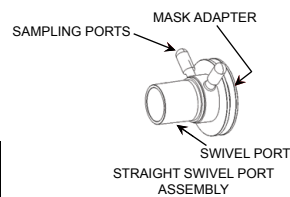

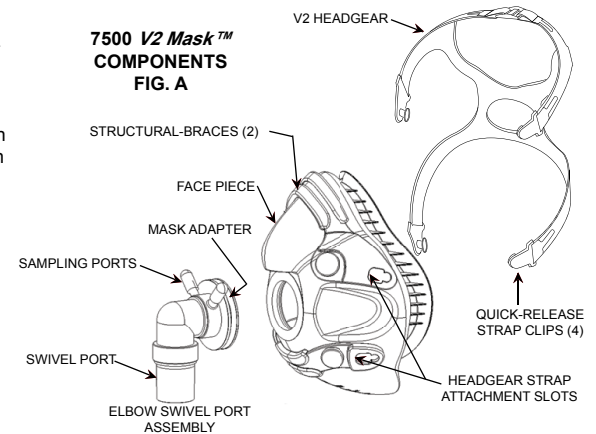

- **Intended Use:** The 7500 Series V2 Masks™ are reusable, multi-patient-use, adult oro-nasal masks intended to provide a patient interface for application of noninvasive ventilation. The masks are to be used as an accessory to continuous ventilators which have adequate alarms and safety systems for ventilator failure.
- **Indications for Use & Environment:** The masks are specifically indicated for use on adult patients (greater than 30 kilograms weight) to administer positive pressure ventilation for treatment of respiratory failure or respiratory insufficiency. They are intended for use on patients who are appropriate candidates for noninvasive ventilation, in the home, hospital, or other clinical settings by individuals that have received at least minimal instruction or training on the use of the masks as well as the device and system to which the masks are intended to connect.
- **Cautions:**
 - a.) Federal law restricts this device to sale by or on the order of a physician.
 - b.) Patients with facial hair, especially beards, may experience mask leakage which may require shaving the hair.
- **Warnings:** Refer to: Instructions for Use, Document No. 691271, shipped with product.
- **Contraindications & Complications:** Refer to: Instructions for Use, Document No. 691271, shipped with product.

MASK SIZING GAUGE

MASK SIZING GAUGE

For Hans Rudolph, Inc. Oro-Nasal V2mask™ and V2mask™ Series Face Masks

Directions: Length measurements are used to determine the correct size. The Mask Sizing Gauge will assist the patient or caregiver in measuring the patient's face. Measure across the bridge of the nose. Place the Gauge Tip in the deepest part of the nasal crease. Depress the wheel and note the callout on the bottom of the gauge. The color next to the bubble is the size range. This gauge is a reference to aid in sizing and is not a final measurement. In clinical factors may need to be taken into account.

"If between sizes, we recommend you use the smaller size."
