

Feel the difference

Philips Respironics SideStream Plus breath-enhanced nebulizer

Fast and efficient aerosol drug delivery with the Philips Respironics SideStream Plus.

Philips Respironics have combined proven SideStream jet technology with a low resistance valve design to create SideStream Plus - a breath-enhanced, active venturi nebulizer. You and your patients can rely on SideStream Plus to deliver fast treatments with less waste.

Our optional filter accessory easily attaches to SideStream Plus to help capture exhaled and uninhaled aerosol, helping to protect others from breathing in unnecessary medication; particularly important when nebulizing antibiotics.

Key features

- Fast treatment times in under five minutes*
- Efficient performance with reduced waste
- Reusable for up to 12 months
- Optional exhalation filter

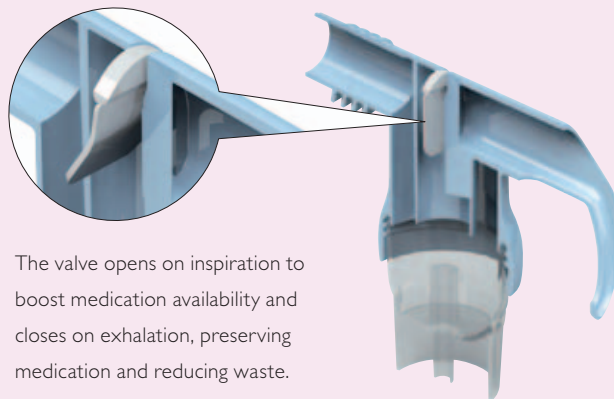

PHILIPS

RESPIRONICS

sense **and** simplicity

The low resistance vertical valve opens easily on inspiration

The valve opens on inspiration to boost medication availability and closes on exhalation, preserving medication and reducing waste.

High-efficiency, breath-enhanced technology

Fast treatments, less waste

Breath-enhanced means more drug is available for delivery during inspiration and less drug is wasted during exhalation.

Suitable for most patients

The low resistance valve is ideal for weaker-breathing users including pediatric and elderly patients.

Multi-purpose

Suitable for nebulizing all commonly prescribed aerosol therapy medications, including antibiotics, bronchodilators and steroids.

Filter attachment

Optional durable filter attachment (with disposable filter pads), or aerosol hose, for nebulizing antibiotics.

SideStream Plus shown here with optional filter attachment

Drug	Salbutamol	Ipratropium bromide
Treatment time	4 mins 14 secs	1 mins 42 secs
MMAD (μm)	3.85	3.53
FPF	63%	68%

Source: * Data on file at Philips Respironics. All testing to International Standard EN 13544-1, 6 lpm driving flow w/CEN breathing pattern.
